Profile Summary

- I 'm a software engineer specialized in Full-stack web development with over 4 years' experience and awesome tech skills.
- Insightful knowledge of web standards, SSL on HTTP, Design Patterns, MVC, Software development lifecycle and development method Scrum
- Fast learner and thrive under pressure of deadlines

Education

BACHELOR B.S. IN SOFTWARE ENGINEERING | FEBRUARY 2013 | YARMOUK PRIVATE UNIVERSITY, SYRIA

· Related coursework: Programing Languages, Robotics, Artificial Intelligence, Design Patterns, Web Fundamental.

Skills & Abilities

MANAGEMENT & COMMUNICATION

· Ability to work independently in a small team
· Providing over all leadership to the entire project team including managing deliverables of other functional team leaders
· Communicating with internal/external clients to determine specific requirements and expectations, managing clients as an indicator of quality
· Speaking English, Arabic, Turkish and Dutch languages

LEADERSHIP & DEVELOPMENT

· Creating and managing the estimates, project plan, project schedule, resource allocation, following the project software development lifecycle methodology development and workflow like Scrum
· Experience of developing in and contributing to open source
· Experience with HTTP, REST, JSON, Software Architecture, data structures, modern design patterns, testing and server-side technologies (web servers, database servers)
· Writing clean code web applications, Strong Object-Oriented Programing skills, debugging code, trouble shooting and problem solving.
· Strong Knowledge with full stack web technologies HTML, CSS, JavaScript, NodeJS, browser APIs and working knowledge programming with more than one programming languages including Java, C++, Ruby on Rails and C#
· Familiarity with SQL/MySQL and Unix/Linux operating systems/commands.
· Familiarity and good understanding for AWS services, Docker and Git version control
· PostgreSQL, Socket.IO, JavaScript Es6/Es5, ExpressJS, TypeScript, CLI, Web Services, C/C++, NoSQL Databases, Gulp/Webpack, PHP, internet protocols.

Experience

FRONTEND DEVELOPER | QUBY - WE CREATE TOON| SEPTEMBER 2017 – PRESENT
· Create functional, appealing, intuitive, responsive, cross-browser web applications based on UX/UI designs
· Contribute to an Agile Scrum team – coding, testing, sharing knowledge, support, team building, having fun
· Hybrid mobile apps development with PhoneGap (Cordova) MVC Backbone based
· Write concise, unit test/integration test, highly performance code and contribute to correct architectural decisions.

SOFTWARE DEVELOPER | AMSTERDAM DATA SCIENCE | JUNE 2016 – DECEMBER 2016
· Crowd Management with social media, responsible for development technology decisions
· Coding back-end utilizing NodeJS and PostgreSQL, API design, development intelligent matching of profile algorithm

FULL STACK DEVELOPER | AKABAKIBI | AUGUEST 2016 - PRESENT
· Self-employed entrepreneurial experience, design architecture full stack web apps
· Coding with NodeJS, JavaScript, Angular, PostgreSQL, REST API and deliver ready product deployment.

SOFTWAR DEVELOPER | OPENEMBASSY | MAY 2016 – MARCH 2017
· Founder of OpenEmbassy, Wrote the front-end and back-end of the system
· Responsible for architecture and implementation of core technology stack
· Participate in the building architecture work in a new generation system developed using Angular2, TypeScript and NodeJS and deployment by AWS services.

FULL STACK DEVELOPER | R-PAC | JUNE 2016 – FEBRUARY 2017
· R-PAC billing portal a freelance web app I developed, responsible for code design and building the full stack.
· Interact with ERP interface, parsing CSV files, building back-end API interface and front-end using Angular martial design, SQL Express and NodeJS

SOFTWARE DEVELOPER | SMG- MUSIC FOR BUSINESS | SEPTEMBER 2014 – SEPTEMBER 2015
· Participate in development SMG Player from scratch running on multiple platforms software and hardware including Raspberry PI, responsible for NodeJS core development, integrated native C audio library with Nodejs using C++.
· Used AngularJS, bower/npm and websocket and .Net web services API, building directives development.

TEAM LEADER | BLINK CO. | MAY 2012 – DECEMBER 2013
· Providing overall leadership to the entire project team
· Participate in development using Java, C#.

Activities & Awards

MIT ENTERPISE FORUM & UBER | OCTOBER 2016

· Innovate for Refugees Competition Integration of New Comers in a new home country.

HACKYOURFUTURE| JANUARY 2016-PRESENT

· Teacher and mentor full-stack development skills, NodeJS and Backend development.

FLL COMPETITION AND ROBOCUB | 2010

· Design and programming Robot from Lego 2010 Participant in FLL (First Lego League) 2010 Participant RoboCup Robots.
